# The Anatomy Of Blackness: Science And Slavery In An Age Of Enlightenment

## Synopsis

This volume examines the Enlightenment-era textualization of the Black African in European thought. Andrew S. Curran rewrites the history of blackness by replicating the practices of eighteenth-century readers. Surveying French and European travelogues, natural histories, works of anatomy, pro- and anti-slavery tracts, philosophical treatises, and literary texts, Curran shows how naturalists and philosophes drew from travel literature to discuss the perceived problem of human blackness within the nascent human sciences, describes how a number of now-forgotten anatomists revolutionized the era's understanding of black Africans, and charts the shift of the slavery debate from the moral, mercantile, and theological realms toward that of the "black body" itself. In tracing this evolution, he shows how blackness changed from a mere descriptor in earlier periods into a thing to be measured, dissected, handled, and often brutalized. Penetrating and comprehensive, *The Anatomy of Blackness* shows that, far from being a monolithic idea, eighteenth-century Africanist discourse emerged out of a vigorous, varied dialogue that involved missionaries, slavers, colonists, naturalists, anatomists, philosophers, and Africans themselves.

## Book Information

Paperback: 328 pages

Publisher: Johns Hopkins University Press; Reprint edition (February 11, 2013)

Language: English

ISBN-10: 1421409658

ISBN-13: 978-1421409658

Product Dimensions: 6 x 0.8 x 9 inches

Shipping Weight: 1.2 pounds (View shipping rates and policies)
