Customer Reviews

Olympic Sports - When and How?: History of Olympic Sports Then, Now and Beyond is another great book for children from Baby Professor and Speedy Publishing. "The Olympic games are the leading international sporting event featuring summer and Winter sports competition in which thousands of athletes from around the world participate in a variety of competitions. Some of the Sports in the Olympics are: Archery - uses a bow and Arrow and debuted in the 1900 summer Olympics. Basketball - uses teams and a basketball making its debut in 1936. Swimming - uses either teams (as in relays) or single swimmers in events. Debut was in 1908. The Javelin Throw - part of track and field events - the athlete throws the javelin for distance. Introduced in 1908 for men and 1932 for women. Fencing - has been in every Olympic game since 1898. Sprints - part of track and field, these are short distance running. between 60 and 400 meters. Judo - introduced in 1964 a

martial art that emphasizes throwing the other person. My grandson is in 3rd grade and this book would be awesome for him. I believe this book should be a part of his extensive library. Something that should be a great read for him. He reads way above his age as he grows so does his knowledge of the world as did his mother at his age. Reading invokes imagination, knowledge from a foundational status. Reading makes the brain work where television arrests the brain function by not making any one think. I so do love these books for children and adults, making us think about what we can do and what might be if we open our minds.****I am grateful to have received this product at a discounted or free rate in exchange for a honest, fair, unbiased and non-compensated review.
