# Anatomy For Anaesthetists

## Synopsis

First published in 1963, Anatomy for Anaesthetists is the definitive anatomy text for anaesthetists in training and remains an invaluable reference for those in practice. The text explores in depth those areas of particular interest to anaesthetists: the respiratory pathway, the heart, the vertebral canal and its contents, the peripheral nerves, the autonomic nervous system, and the cranial nerves, and also includes sections on the anatomy of pain and other zones of anaesthetic interest. This new 9th edition has been fully revised and updated to incorporate developments in regional techniques and the increased use of ultrasound.

## Book Information

Hardcover: 360 pages

Publisher: Wiley-Blackwell; 9 edition (December 31, 2013)

Language: English

ISBN-10: 111837598X

ISBN-13: 978-1118375983

Product Dimensions: 6.9 x 0.8 x 9.9 inches

Shipping Weight: 4.7 pounds (View shipping rates and policies)
